Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Reissue Applications

1. The requirement for the submission of the original patent, or a statement as to loss or inaccessibility of the original patent, is deferred as requested by the Applicant. However, the Applicant is reminded that the original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites "an interface for receiving words of pixel data, each said word associated with an address buffer". There is no clear written description in the specification of associating a word of pixel data with "an address buffer". Specifically, the pages in the specification noted by the Applicant in the previous response, were reviewed but no clear written description of an address buffer was found. Claims 2-12 are dependent on claim 1 and therefore are similarly rejected.

Allowable Subject Matter

4. Claims 13-48 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: the cited prior art does not disclose or render obvious the combination of elements recited in the claims. Specifically, the cited prior art fails to disclose or render obvious the following limitations: a port receiving both graphics and video data associated with addresses indicating that the data are to be processed as graphics or video data as well as a second port receiving real-time video data as per claim 13; an input port receiving both graphics and video data associated with addresses indicating that the data are to be processed as graphics or video data, writing playback data into a selected on-screen or off-screen area of the multi-format frame buffer, and memory control circuitry controlling the transfer of data between the multi-format frame buffer and the two backend pipelines as per claim 25; a video pipeline comprising a first and a second FIFO disposed in parallel to each other receiving selected data selected from on-screen and off-screen spaces of a frame buffer as per independent claim 34; a display controller including "circuitry for selectively retrieving" data from a multiformat frame buffer simultaneously storing video and graphics data as per claims 37 and 43; and retrieving video data from a frame buffer simultaneously storing graphics and video data and providing the video data to the video pipeline only when a video display window is being generated as per claims 42 and 44.

Response to Arguments

6. Applicant's arguments with respect to the rejection of claims 1-12 under 35 U.S.C. 112, first paragraph have been fully considered but they are not persuasive. As noted above, the specification does not provide a clear written description of the limitation "an interface for receiving words of pixel data, each said word associated with an address buffer" of claim 1. Specifically, the pages in the specification noted by the Applicant in the previous response, were

reviewed but no clear written description of "an address buffer" or associating a word of pixel data with an "address buffer" was found.

Conclusion

7. **THIS ACTION IS MADE FINAL.** A shortened statutory period for reply to this final action is set to expire ONE MONTH from the mailing date of this action.
